

Personal Electric Breast Pump Set

Looking for a breast pump covered by your insurance? You've found it. The **Purely Yours Double Electric Breast Pump** by Ameda. The Purely Yours Breast Pump combines **hospital-recommended** technology and **mom-friendly** features. It's perfect for mothers working full-time and for those who want fast and easy breast-pumping experience.

Purity Proven Airlock Protection™

- Help protect your breast milk and your baby from bacteria, mold and viruses while pumping.¹
- Ameda has the world's only breast pump with a proven protective barrier. Proven Airlock Protection means our diaphragm keeps the air from coming in contact with your milk while pumping.
- No need to clean the narrow tubing. Even if the container is turned, moisture and milk aerosols will not enter the tubing or pump.

Ease CustomControl™

- Independent Speed and Suction controls make it possible for mothers to achieve a multi-phase experience.
- Each mother can customize her pump's settings to her own body's response and follow her flow to find her own best settings every time.
- The independent adjustable controls make it possible for a mother to keep the pump set on her maximum comfortable suction level while varying the speed to more quickly trigger milk ejections.

This comfortable and effective breast pump motor weighs only 1 pound. It can be conveniently powered by AC Adapter (included), six AA batteries, or car adapter.

Batteries and car adapter sold separately.

Guidelines for Insurance-Covered Pump

To learn more about the pump and how to qualify, call or visit a BLACKBURN'S showroom near you.

Our customer service representative will facilitate your order and qualify your insurance coverage. Breast pumps can not be issued until your baby is born.
