

## BLACKBURN'S...Choice Vendor through WoundExpert...Electronic Ordering Portal

On April 20, 2015, BLACKBURN'S partnered with **net health** and became a choice vendor through WoundExpert for wound care supplies. Wound care clinics currently opted into the WoundExpert ordering portal are now able to choose BLACKBURN'S as the provider for their patients.

WoundExpert is a web-based electronic medical record system that is simple to use for wound care management by wound care clinics. The platform integrates clinical, financial and regulatory solutions that provide clinicians an easy method to improve facility performance.

**WoundExpert**<sup>™</sup>  
Software for Wound Management

The platform includes features, such as data collection, assessment, documentation, scheduling, electronic patient charting and electronic ordering. When BLACKBURN'S is chosen as the DME provider, the ordering portal transmits the order electronically to BLACKBURN'S. Once an order is in the portal, an email is generated notifying us of the order. A team of highly trained Customer Service Representatives, dedicated to the processing of these orders, retrieves the order from the portal and processes it in an efficient and timely manner.

BLACKBURN'S has developed a comprehensive Clinical Wound Care Program Formulary which outlines the wound care products available, a New Patient Welcome Letter for use by a clinic, and an Integrated Healthcare Products & Service Sheet. The Integrated Healthcare Products & Service Sheet provides clinics and patients information regarding all of the products and services offered by BLACKBURN'S. Some of these include: Rehabilitation & Mobility Equipment; Medical Supplies such as ostomy, tracheostomy supplies, and enteral nutrition; Respiratory Supplies & Services including ventilators; Accessibility Products, such as stair lifts and ramps; Pharmacy Services; and Bariatric Equipment and Support Surfaces.

At BLACKBURN'S we strive to be a regional provider leading with clinical-based services for our customers and referral sources. We will continue to provide full-scale programs for our customers with the most advanced needs.
